

 **STACK**

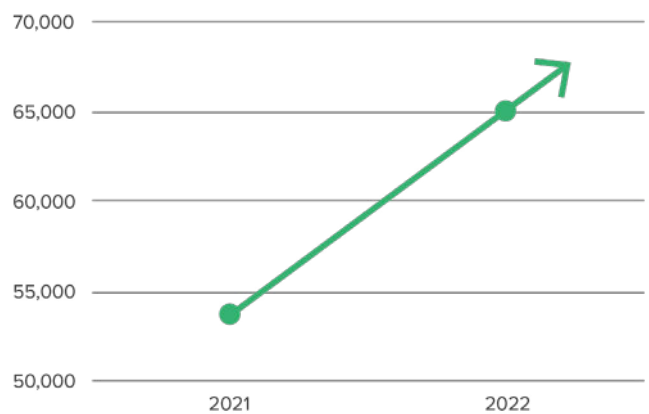

How We STACK Up: Data Security

The ultimate guide to ensure your data is protected.

Why should I be concerned about Data Security?

Data breaches can affect everyone.
Data breaches occur nearly half-and-half in big and small businesses.¹

You might be vulnerable to attacks!
65,000 vulnerabilities were discovered in 2022 alone. That's an increase of over 21% from 2021.²

How We Can Help

We understand that no matter the size of your business, you need a commitment from your tech partners to securing your data. Independent and transparent evaluation is crucial. In this eBook, you can learn what STACK is doing to help keep you protected.

SecurityScorecard	3
SOC 2 Compliance	4
Auth0 Authentication & Authorization	4

1. Verizon Data Breach Investigations Report

2. Hacker-Powered Security Report 2022

SecurityScorecard

SecurityScorecard provides easy-to-understand A-F graded scorecards for improved communication, effective compliance reporting, and more informed decision making.

How it Works

SecurityScorecard calculates scores based on 10 factors that reflect different cybersecurity practices and risks.

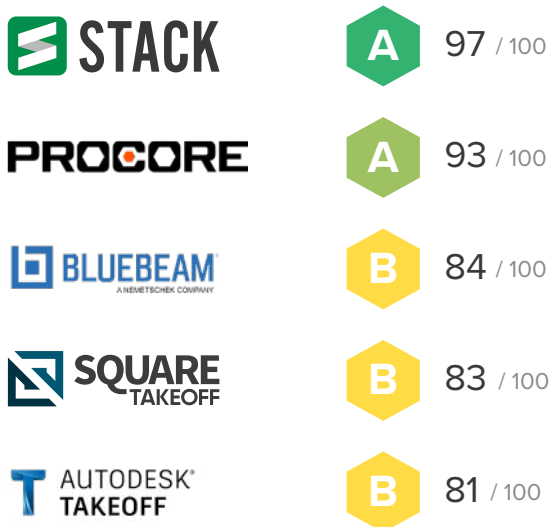

Factor	Weights
Application Security	Medium
Cubit Score	Medium
DNS Health	Medium
Endpoint Security	High
Hacker Chatter	Low
IP Reputation	High
Information Leak	Low
Network Security	Medium
Patching Cadence	Low
Social Engineering	Low

How We Score

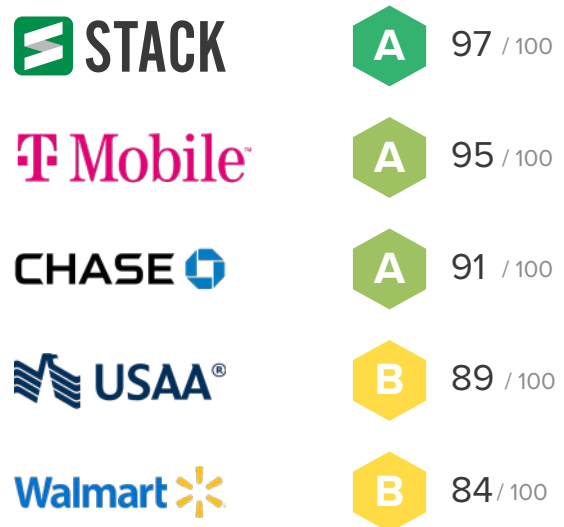

Factor	Score
Application Security	92
Cubit Score	100
DNS Health	100
Endpoint Security	100
Hacker Chatter	100
IP Reputation	100
Information Leak	100
Network Security	100
Patching Cadence	100
Social Engineering	100

STACK v. Construction Tech

STACK v. Major Companies

SOC 2 Compliance

SOC 2 is an auditing procedure developed by the American Institute of CPAs to ensure security, availability, processing integrity, and data confidentiality. Organizations can obtain compliance only via a rigorous auditing process. **STACK is SOC 2 compliant.**

- ✓ Access Control
- ✓ Two-Factor Authentication
- ✓ Encryption
- ✓ Network/Application Firewalls
- ✓ Intrusion Detection
- ✓ Performance Monitoring
- ✓ Processing Monitoring
- ✓ Disaster Recovery
- ✓ Security Incident Handling
- ✓ Quality Assurance

Auth0 Authentication & Authorization

By implementing Auth0 single sign-on (SSO), user management, and identity analytics, STACK helps ensure that user data is protected.
